

### **REMARKS**

The Examiner has issued a restriction requirement stating that the application claims four separate inventions. Specifically, the Examiner identifies the four inventions as being:

- I. Claims 69-111, drawn to a method of depositing elemental metal in the vicinity of an enzyme;
- II. Claims 112-128 (which Applicants assume should have been 112-122), drawn to a kit for depositing elemental metal in the vicinity of an enzyme;
- III. Claims 123-128, drawn to a kit for detecting a gene or protein; and
- IV. Claims 129-136, drawn to a kit.

Pursuant to 37 C.F.R. §1.142, Applicants elect Group III, Claims 123-128 without traverse. Accordingly, Claims 69-122 and 129-136 are canceled without prejudice. Applicants reserve the right pursuant to 35 U.S.C. §121 to file one or more divisional applications directed to the non-elected inventions during the pendency of the present application.
